# about omega

Since 1989, OMEGA was rising with the beliefs of the power of collaboration – working together to innovate and achieve the best results. OMEGA is founded on the principle of exceptional service. With our streamlined experience, we have mastered the state of the art electromechanical services, while maintaining close, responsive, client relationships at all levels. Today, with hundreds of choices in the Egyptian marketplace, it's crucial to choose a firm with the size and scope to handle your needs, and a dedicated management team that puts the best service at your doorstep.

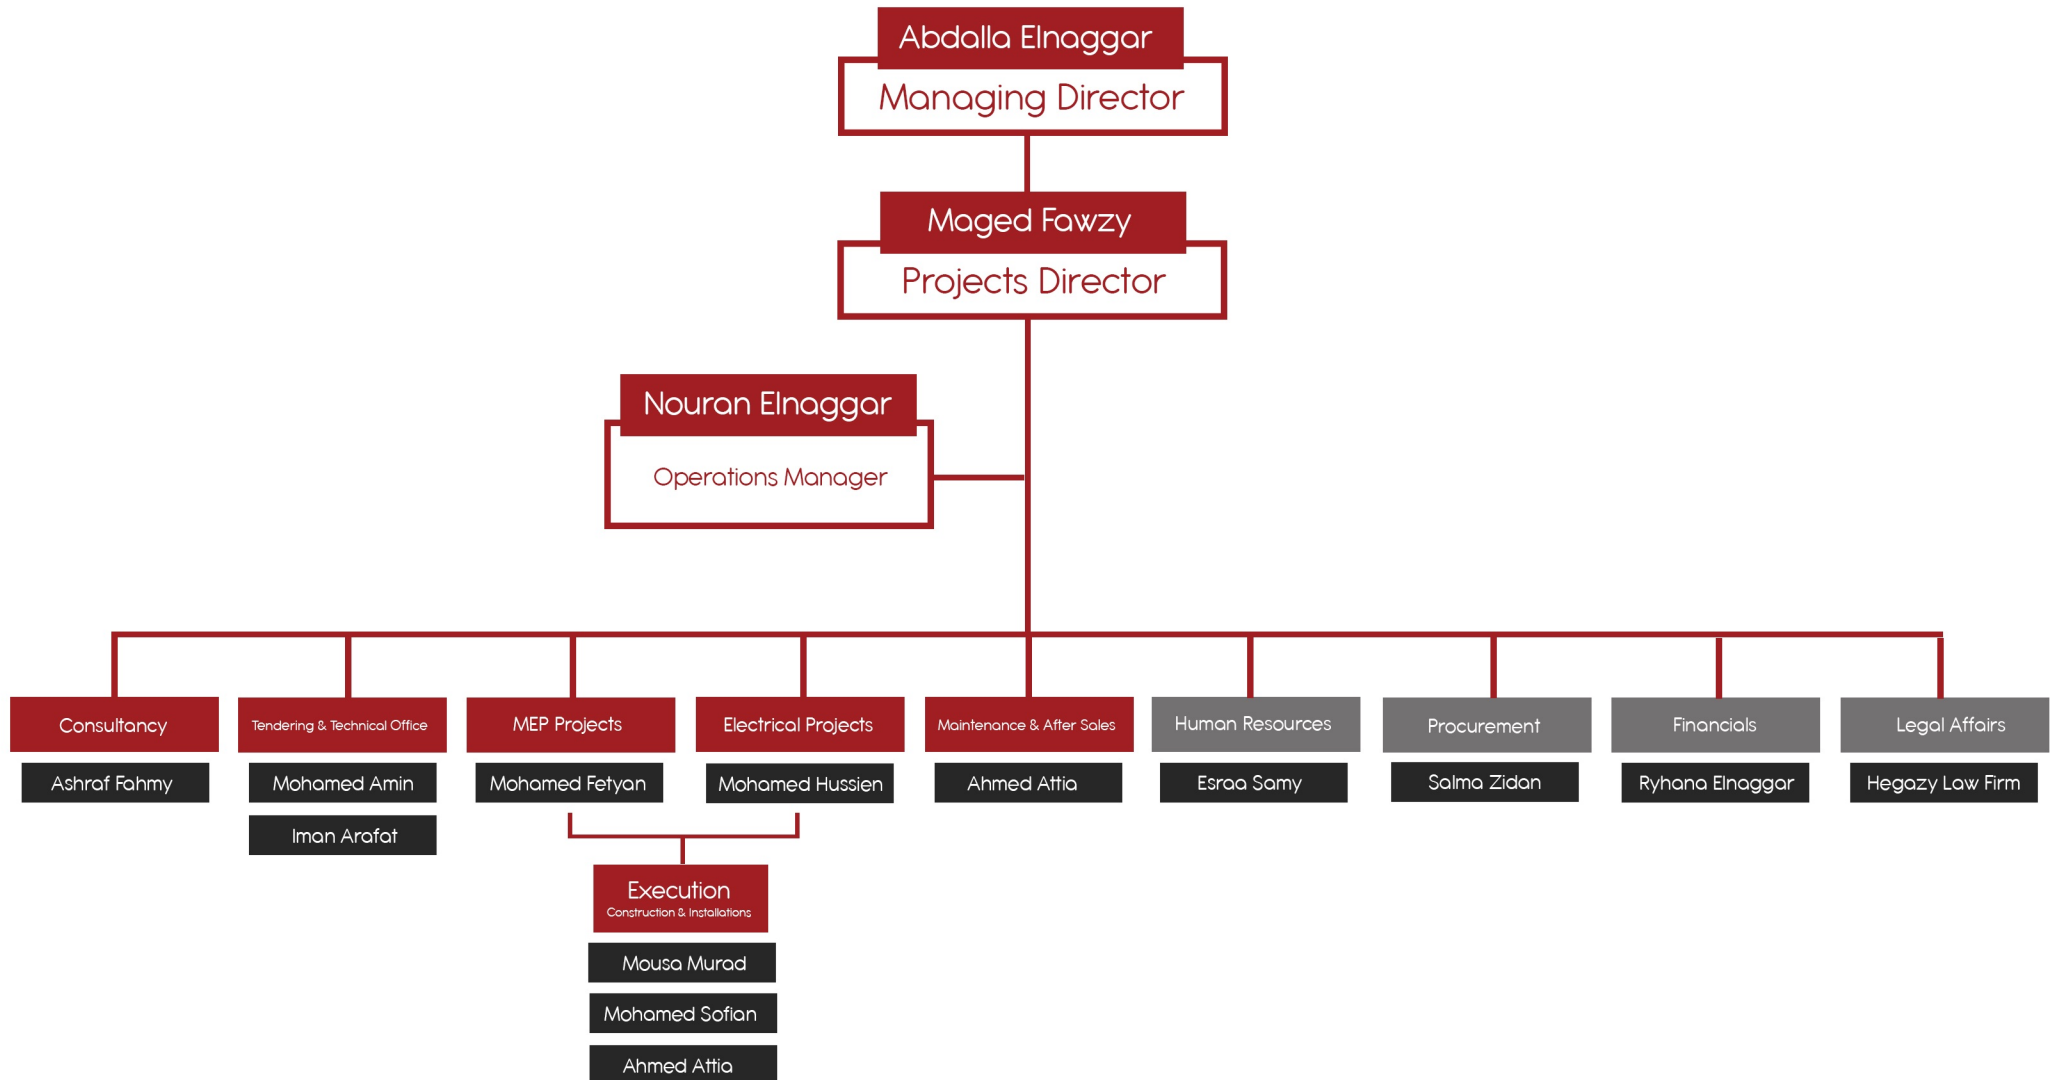

Our mission is to provide our clients the safety, quality and peace of mind that comes from knowing that the best services in the electromechanical market can only be achieved through uncompromising standards and attention to detail. We believe that real electromechanical challenges require real advanced solutions by competent professionals.

Since its inception, the company has undertaken a prestigious portfolio of electromechanical projects within the Middle East including Hotels & Resorts, High Rise Commercial and Residential Buildings, Mall and Shopping Complexes, Governmental Water Stations, Multispecialty Hospitals, Central Cooling Plants, Schools and Education Institutions, Industrial Installations and Applications and Airport and Runways.

Moreover, the organization has diversified interest in the various electromechanical activities mainly in Electrical- Installations and Testing of HV, MV, LV & ELV system and mechanically HVAC, and Plumbing works. Also engineering and Drafting works for Complete MEP works for main and shop drawings. We are also able to handle EPC contracts, providing project management services starting from the engineering and design phase until testing and commissioning activities and project handing over. The main aim is to serve the client with at most satisfactions & provide the complete range of services for Design, Installations and after services.
